VAN CROMBRUGGEN AND THE HOSPITALITY INDUSTRY

HYGIENE AND FOOD SAFETY:

Supported by system certifications such as HACCP, BRC, IFS, Bio and Fairtrade, we keep on building towards a future in which quality and food safety take centre stage.

OUTSTANDING QUALITY

We stand out because we select our suppliers and raw materials with the utmost care and thoroughness and guarantee the best quality products.

RESEARCH & DEVELOPMENT

Faced with a rapidly changing world and society, we continuously cater to the ongoing demand for innovation in terms of our products and production processes so as to enable all our relationships and partners to achieve a positive result.

ECOLOGY AND THE ENVIRONMENT

We can no longer ignore it! Mother Nature also requires our attention and demands recognition for her strengths and qualities. That's why we are always looking for innovative and environmentally friendly solutions to minimise our collective ecological footprint.

CREATIVITY UNDER DEVELOPMENT

Creativity refers to the ability to create something new, for instance while developing a new concept or while finding an original solution to a specific problem. We always try to support our partners during their creation process. It does not matter whether it concerns the development of a new film or concept or the search for a solution to a new challenge.

ATTENTION AND DUE CARE

We focus our undivided attention on all aspects of the system throughout the production process (from development to production). We take great care to facilitate each step as much as possible, taking into account the needs of our customers.
